EXPERIENCE

NCR Corporation, Remote — Software Developer Co-op

MAY 2020 - SEPTEMBER 2020

- Refactored integration test suite into its own project that other projects could utilize as a dependency
- Updated 7 team projects by adding testing dependency and dozens of REST service integration tests
- Worked with a remote agile team through a 4-month program increment including planning and developing of new features for an integration project

Sun Life Financial, Waterloo, ON — App Developer Co-op

JANUARY 2020 - APRIL 2020

- Reduced build times of applications during development by 20-30% by creating a RESTful Web App for disabling unused services in applications
- Developed real-time microservice tracking application, automating the status checking of application services

University of Guelph, Guelph, ON — App Developer Co-op

MAY 2019 - AUGUST 2019

- Led development of a web application for new student meal plan information, automating the report generating and database updating process
- Upgraded and maintained mobile application for scanning tickets during convocation ceremonies

Tulip Retail, Kitchener, ON — Test Automation Developer Co-op

SEPTEMBER 2018 - DECEMBER 2018

- Collaborated in a small team to develop an automated test suite that reduced manual test cases being run on iOS applications by 50%
- Reduced nightly execution times of automated test suite by 30% through the reconfiguration of testing API
